PROFESSIONAL EXPERIENCE

McHaven Tech

2023 – Present | Harare, Zimbabwe

System Administrator / Developer (T24 Specialist)

- Serve as a **T24 System Analyst/Developer**, managing core banking system functionalities and analysis.
- Maintain system integrity and optimize workflow processes to ensure high availability of banking services.
- Bridge the gap between complex backend banking logic and user-facing requirements.
- Configure and troubleshoot banking modules to support operational efficiency.
- **T24 Technologies:** Proficient in jBASE, TAFC, TAFJ, and InfoBasic; experienced with modules such as AA (Arrangement Architecture) and FT (Funds Transfer).

Moscow State University of Technology "STANKIN"

2022 – 2023 | Moscow, Russia

Technical Assistant (Faculty of IT)

- Supported the Faculty of Information Technology in technical operations and academic resource management.
- Assisted in the maintenance of departmental IT infrastructure while completing Master's level research.
- Facilitated communication between technical staff and students in a multilingual environment.

Solaregy (Startup)

2021 – 2023 | Harare, Zimbabwe

Web Developer

- Engineered clean, intuitive interfaces for front-end public and internal websites, significantly improving user experience.
- Managed the full lifecycle of detailed programming tasks, translating concepts into functional web applications.
- Collaborated within a startup environment to develop project concepts and maintain optimal development workflows.

KEY PROJECTS

- **Song Book Web Application:** Developed a fully functional web application using **Vue.js** for the frontend (Live at: atmosphereapp.ru).
- **Delivery Application:** Built a cross-platform delivery solution handling both frontend and backend operations using **C# and Xamarin Forms**.
